

Africa Energy Storage Power Supply Procurement

Africa Energy Storage Power Supply Procurement

Does South Africa have a battery storage tender programme? South Africa is aiming to procure utility-scale battery storage with two tender programmes: its Battery Storage IPP Procurement Programme as well as hybrid battery storage and variable renewables projects through its Risk Mitigation IPP Procurement Programme. Why is the South African government using IPP to allocate battery storage? In 2022, this led to unprecedented load shedding of more than 8 terawatt-hours (TWh), which was a fourfold increase in unmet demand compared with the previous year. As a result, the South African government is using its Independent Power Producer (IPP) Procurement Programmes to allocate firm capacity, including battery storage. What are the most popular solar-plus-storage developments in Africa? As noted by AFSIA Solar, one of the most notable solar-plus-storage developments in Africa is Norway-based independent power producer (IPP) Scatec's 225MW/1,140MWh Kenhardt project in South Africa. The site started operation in late 2022 (pictured above). Why is battery storage important in South Africa? In South Africa, battery storage is increasingly seen as a key pillar to help provide grid stability and integrate variable renewables given its ageing coal-fired power fleet and grid. Does Scatec have a solar-plus-storage site in South Africa? Scatec's Kenhardt solar-plus-storage site in South Africa (above), which went online at the end of 2022. Image: Scatec. Africa's energy storage market has seen a boom since 2020, having risen from just 31MWh to 1,600MWh in 2023, according to trade body AFSIA Solar's latest report. What is the battery energy storage programme? The evaluation process, conducted by an Independent Bid Evaluation Committee under strict security measures, took place at the IPP Office. The Battery Energy Storage Programme is a critical initiative aimed at enhancing South Africa's power system by providing essential ancillary services and increasing grid capacity through energy storage. Envision Bags 257MW South African BESS These projects are integral to South Africa's inaugural Battery Energy Storage Independent Power Producer Procurement Programme Minister Kgosientsho Ramokgopa on Battery Energy Storage May 30, 2023 The Minister of Electricity and Energy, Hon. Dr. Kgosientsho Ramokgopa, has announced the appointment of five (5) Preferred Bidders under the Battery Energy Storage Utility-scale batteries in South Africa: Improving grid stability Oct 29, 2023 In November 2023, South Africa announced preferred bidders for the first Battery Energy Storage IPP Procurement Programme tender, which - if all implemented in full - would 'Energy storage boom' in Africa from 31MWh Jan 20, 2023 Africa's energy storage market has boomed since 2020, rising from 31MWh to 1,600MWh in 2023, according to trade body AFSIA Solar. Envision secures 1 GWh deal with EDF, South Dec 16, 2023 Supply chain Envision secures 1 GWh deal with EDF, South Africa's largest battery energy storage order The projects represent three Battery storage systems changing energy procurement in Africa Oct 16, 2023 The business case for using battery energy storage technology has changed dramatically in the last two years. According to the IEA, China currently produces more than 100 TWh of battery energy storage capacity. South Africa Selects Preferred Bidders for 616 MW Battery Storage Jun 3, 2023 The Department of Mineral Resources and Energy (DMRE) has
