How to connect the DC panel to the battery cabinet

How do you wire a battery cabinet? Secure the battery wiring to the wire tie anchors (see Figure 24) using Zip ties. Route the battery cabinet ground wiring from the UPS through the bottom side inter-cabinet access pass-through (see 4.4.1 Line-Up-and-Match Power Wiring) of the UPS cabinet and IBC-SW to the IBC-SW ground terminal block. How do I connect a battery cabinet to a ups? Route the battery cabinet ground wiring from the UPS through the top of the IBC-SW to the wiring channel on the left side of the IBC-SW (see Figure 22). Route the wiring along the wiring channel to the IBC-SW ground terminal block. See Figure 23 for terminal location. Where is the UPS battery cabinet located? The battery cabinet may be located to either the right or left of the UPS cabinet. This procedure assumes the battery cabinet is located to the right of the UPS cabinet.

14. If line-up-and-match installation, remove the rectangular and circular knockout on the bottom and top front side of the UPS and the IBC-SW (see Figure 9). 15. How do you wire a UPS battery? Route the battery wiring (positive and negative) from the UPS DC Input terminals through the bottom side inter-cabinet access pass-through (see Figure 9) of the UPS cabinet and IBC-SW to the wiring channel on the left side of the IBC-SW (see Figure 22). Route the wiring along the wiring channel to the IBC-SW DC Output terminal block. How do you level a battery cabinet? Remove the side panels that are adjacent to the other battery cabinets. Push the right-most battery cabinet into position. For seismic anchoring, ensure that the rear seismic bracket connects to the rear anchors. Lower the levelling feet until they connect with the floor - use a bubble-leveler to ensure that the cabinet is level. How do you reinstall a battery cabinet? Reinstall the left side panel on the left-most battery cabinet after interconnection. Push the third battery cabinet into position, align with the seismic anchoring (if any), level the battery cabinet, and interconnect with the other battery cabinets as described in step 2, step 3, and step 5.
