Lithium battery pack contacts rust

What should I do if my battery contacts rust? If contacts are heavily rusted or damaged, you may want to use an abrasive such as sandpaper to clean to the base metal. Because many battery contacts are nickel plated, if the corrosion has eaten through this plating the contacts may be susceptible to rusting in the future. How do I fix a rusty battery? Once your wiring is hooked back up to your battery, you can apply White Lithium Grease to all the bare metal parts at the connection points. This will not only take care of your current problem, but prevent future build up or rust. Why is my lead acid battery Rusty? Rusty terminals are most common on Sealed Lead Acid batteries but it can occur on any unit where the terminals are not stainless steel. To remedy the problem, first remove the cables or wiring from your battery noting the following: You will want to disconnect the negative terminal first, then the positive terminal. How to clean a corroded battery terminal? Or better yet, opt for lithium deep cycle batteries for a superior, safer alternative. To clean a corroded battery terminal you'll need products that can help break down the acid on the terminals. You can purchase these products from auto parts stores or online shops. You could also opt for homemade corrosion removal methods. Does white lithium grease cause electrical problems? The White Lithium Grease will not cause issues with your electrical connection and can be found in your local automotive store. The grease will prevent corrosion by forming a layer between the conducting surfaces, eliminating contact by moisture and air. How to avoid battery corrosion? The best way to avoid battery corrosion is to use batteries that aren't prone to this issue. Lithium batteries are an amazing alternative because they don't require maintenance, venting, or face issues of corrosion. They don't emit the corrosive gasses that affect terminals, thus, they're considered safer and more reliable. What should I do if my battery terminals are rusty?
