Power SystemWhat Is A Station Transformer?Station Transformers and The Auxiliary SystemThe  
Importance of A Station TransformerGenerally speaking, a station transformer is a step-down  
transformer, meaning it reduces the voltage - this is in contrast to a step-up transformer, which  
naturally increases it. This dynamic ensures that the right level of electricity arrives at homes, with  
the step-down transformer getting it to a more manageable amount fSee more on peaksubstation
