## Tonga Energy Storage Battery Project

Can Australia help secure Tonga's outer island energy needs? Australia also has a long history of engagement in relation to helping secure Tonga's outer island energy needs. In the early 2000s, Australia funded the Ha'apai Outer Islands Electrification project (HOIEP), which involved the installation of diesel-powered generators and electrical reticulation on four islands in the Ha'apai group. How many people have access to electricity in Tonga? This means that little more than 30,000 people are spread across 35 islands, presenting acute issues in terms of the provision of modern infrastructure. At OIREP commencement, the ADB estimated that 89% of all households across Tonga had access to electricity. Why is electricity so expensive in Tonga? This has contributed to the Tongan economy and electricity consumers being exposed to high and volatile electricity prices due to fluctuations in the price of oil internationally. According to UK-based aggregate website Cable, Tonga's electricity is the 13th most expensive in the world, at an average cost of USD 0.35 per kilowatt hour (kWh). Why did OIREP work with Tonga Power Limited? OIREP's on-grid work was always a matter of laying the foundations for further investment in renewables and enjoyed the ease of working through one implementing partner - Tonga Power Limited - who were incentivised to help ensure the program succeeded given they will manage all on-grid assets post-project. How did the OIREP project impact Tonga? The project achieved its proposed impact, in terms of helping Tonga reduce its dependence on imported fossil fuel for power generation with OIREP assets estimated to have reduced diesel usage by 0.5 million litres annually. Central to the project outcome was the provision of on-grid and off-grid generation solar power at reduced cost. How can OIREP help Tonga's remote island communities? However, significant needs and opportunities exist to further expand renewable energy systems on outer islands. Less tangible, but also important is the role played by OIREP in consolidating Tonga's social contract with remote island dwelling communities, by allowing for enhanced and more reliable access to electricity. Australia's contribution to the multi-donor Tonga Outer Jul 31, PMU PSC PV RE SHS SOE TA TERM TPL TREP TSDF II Asian Development Bank Australian High Commission Battery Energy Storage System Australian Department of Our Projects | Tonga Power Limited Tonga Power Limited is currently undertaking renewable energy projects, network upgrade projects as well as Battery Energy Storage projects which all contribute to ensuring Tonga Tonga's first BESS project inaugurated Oct 25, The first utility-scale battery project in Tonga officially opened today at an event attended by the South Pacific Kingdom's prime minister. Tonga south source energy storage project In megawatt terms, the project is larger than Vistra Energy's 400MW Moss Landing Energy Storage Facility project in California, which is the world's biggest standalone battery system, Tonga Energy Storage Battery Project A solar-plus-storage project combining 300kW of PV and a 2MWh battery energy storage system (BESS) has been installed in the Polynesian archipelago nation of Tonga.
