How many GW of battery storage will AGL Energy have? AAP Image/Matt Turner AGL Energy has outlined plans to lock in another 1.4 gigawatts (GW) of grid scale battery storage projects over the coming year, in the race to transform its electricity generation portfolio from its current mix of roughly 80 per cent coal to a majority of firm renewables. What's going on with AGL's battery storage plans? Sophie has been writing about clean energy for more than a decade. AGL details plans to lock in another 1.4 gigawatts (GW) of grid scale battery storage projects over the coming year, in the race to transform its electricity mix from roughly 80 per cent coal to firm renewables. What is AGL Energy's final investment decision? AGL Energy Limited (AGL) has reached a Final Investment Decision (FID) on a 500 MW, four-hour duration, grid scale battery to be located in the Hunter Region of New South Wales. Construction work for the battery is expected to begin in late , with the commencement of operations targeted for late . How many batteries will AGL invest in ? In an investor presentation delivered after the release of its half-year results for the financial year, AGL says it is targeting final investment decisions for four new big batteries totalling 900 MW in New South Wales and one 500 MW battery in Queensland. Most appear to be around two hours of storage, although this could change. Does AGL own a big battery? AGL already owns and operates the Torrens Island big battery in South Australia and the Broken Hill battery in NSW, is building the 500 MW, 1,000 MWh Liddell battery at the site of the shuttered coal plant and has contracted the second stage of the big Western Downs battery in Queensland being built by Neoen. Will AGL invest in another 900 MW grid-scale battery project? Nicks added that AGL has a clear pathway to a final investment decision on another 900 MW of grid-scale battery projects, as it aims to accelerate the development of a grid-scale battery portfolio and grow a fleet of flexible assets. Australian energy major, AGL, has reached final investment decision on the 500 MW / 2,000 MWh Tomago battery energy storage system in the Hunter Region, New South Wales, and has appointed energy storage company Fluence to deliver the project's build. Australia's AGL Energy dedicates AU\$900 Aug 19, AGL Energy has deployed approximately AU\$900 million toward BESS and renewables in Australia during the fiscal year ending Final Investment Decision on the 500 MW Tomago Battery Jul 31, AGL Energy Limited (AGL) has reached a Final Investment Decision (FID) on a 500 MW, four-hour duration, grid scale battery to be located in the Hunter Region of New South AGL targets another five big battery projects Feb 12, AGL Energy has outlined plans to lock in another 1.4 gigawatts (GW) of grid scale battery storage projects over the coming AGL Energy eyes 1.4 GW battery capacity FID Feb 17, AGL Energy Limited is targeting a Financial Investment Decision for 1.4 gigawatts (GW) of battery capacity within the next 12-18 AGL power play on big batteries, adamantly nuclear-free Feb 12, AGL Energy is staying nuclear free as it presses ahead with the closure of coal-fired power stations as required by biggest shareholder Mike Cannon-Brookes. One of AGL Energy in major battery storage play with \$250m firm Aug 14, In a significant

strategic move, coal and gas giant AGL Energy is gearing up to acquire Firm Power, a leading developer of large-scale battery energy storage systems AGL approves 2,000 MWh battery project Aug 1, Australian Gas Light Co. (AGL) has reached a final investment decision on its 500 MW/2,000 MWh Tomago battery energy storage AGL Energy targets 1.2GW of new battery storage by , AGL Energy Ltd., Sydney, Australia, has set a goal of installing 1,200MW of new battery storage and demand response capacity by , and is tying the bonuses for executives and senior AGL says batteries will be its new cash cow as Aug 13, Australia's biggest coal generator, AGL Energy, says its rapidly growing battery storage portfolio - both big and small - will AGL reaches final investment decision on 2,000 MWh Tomago big batteryAug 1, Australian energy major, AGL, has reached final investment decision on the 500 MW / 2,000 MWh Tomago battery energy storage system in the Hunter Region, New South Australia's AGL Energy dedicates AU\$900 million to battery storage Aug 19, AGL Energy has deployed approximately AU\$900 million toward BESS and renewables in Australia during the fiscal year ending June . AGL targets another five big battery projects amid falling Feb 12, AGL Energy has outlined plans to lock in another 1.4 gigawatts (GW) of grid scale battery storage projects over the coming year, in the race to transform its electricity generation AGL Energy eyes 1.4 GW battery capacity FID in FY /Feb 17, AGL Energy Limited is targeting a Financial Investment Decision for 1.4 gigawatts (GW) of battery capacity within the next 12-18 months. AGL approves 2,000 MWh battery project with Fluence in Aug 1, Australian Gas Light Co. (AGL) has reached a final investment decision on its 500 MW/2,000 MWh Tomago battery energy storage system (BESS) in Australia. It has selected AGL says batteries will be its new cash cow as coal fades in Aug 13, Australia's biggest coal generator, AGL Energy, says its rapidly growing battery storage portfolio - both big and small - will emerge as a major cash cow for the company as AGL reaches final investment decision on 2,000 MWh Tomago big batteryAug 1, Australian energy major, AGL, has reached final investment decision on the 500 MW / 2,000 MWh Tomago battery energy storage system in the Hunter Region, New South AGL says batteries will be its new cash cow as coal fades in Aug 13, Australia's biggest coal generator, AGL Energy, says its rapidly growing battery storage portfolio - both big and small - will emerge as a major cash cow for the company as AGL Acquires 8.1 GW Renewable Pipeline for \$250MAug 17, AGL Expands Battery Storage with Firm Power Deal The acquisition of Firm Power adds 6.1 GW of grid-scale battery energy storage projects to AGL's portfolio. The AGL Energy - Liddell Large Scale Battery May 6, AGL Energy is developing the Liddell Battery Energy Storage System (BESS), a 500 MW/ MWh facility at the retired Liddell Power Station site in NSW. This grid-forming AGL Energy's Tomago BESS: A Strategic Cornerstone in Australia's Energy Jul 31, As the global energy landscape pivots toward decarbonization, Australia has emerged as a pivotal battleground for innovation in grid-scale battery storage. At the heart of AGL's 500 megawatt Tomago battery gains final planning Nov 25, AGL's Torrens Island Battery in South Australia. AGL's \$1billion 500 megawatt battery energy storage system at Tomago has received final planning approval.
