What is a solar inverter? A solar inverter is a critical component of a solar energy system, responsible for converting the direct current (DC) power generated by solar panels into alternating current (AC) power that can be used to power homes and businesses. The process of converting DC to AC involves several stages, including the following: Who makes the best solar inverter in Australia? #1 European PV inverter manufacturer brand*. With its German engineering and design, SMA is the chosen brand in the Australian solar market. 100% of SMA inverters are comprehensively tested before leaving the factory to ensure reliable operation for the life of the inverter. SMA has installed over 90 GW of inverter capacity worldwide. Who should install a solar inverter? Solar inverters should always be installed by a professional installer, like ZEN Energy, with experience in solar energy systems. Attempting to install a solar inverter yourself could be dangerous and may also result in damage to the inverter, the solar panels, or other components of your solar energy system. How efficient is a solar inverter? The industry average for peak efficiency is 97%. Cost: The size and type of solar inverter that you choose directly affects the cost. Size options: A range of sizes means a solar inverter can pair well with a wider variety of solar systems, which is why it is included as a factor in this analysis.
